

Avery Dennison® Supreme Wrapping™ Film for Marine Applications

With new Avery Dennison® Edge Sealer

The versatile and highly popular Avery Dennison® Supreme Wrapping™ Film range is now available for above the waterline wrapping applications at marine environment.

Avery Dennison has developed a high performance Edge Sealer that seals the edges of the installed film and prevents lifting due to water and chemical penetration. The long-lasting liquid sealant allows installers to benefit from best-in-class Supreme Wrapping Film performance across many marine projects. A broad range of film colours is available, opening up a wide range of new aesthetic opportunities for boat owners who want to revamp and renew their boat using products that look good over time.

KEY FEATURES

- > Supreme Wrapping Film now available for above-the-waterline marine applications
- > Edge-sealed wraps resist water and chemical penetration
- > Edge Sealer fluid applies easily and dries fast - without dilution
- > Finished wraps are durable and UV stable
- > Edge Sealer is transparent, with a glossy finish

KEY BENEFITS

- > New design possibilities for boat decoration
- > Long-lasting and best-in-class product performance for marine applications*
- > Long term film removability, preserving boat paint and boat value
- > Faster than boat painting (less drying time and no masking)
